

Formula Specification

T008 High Speed Wax Flat Print-head

Highly versatile wax grade for use on a wide range of paper label stocks. It is especially suited to printing at 200mm/sec or over with flat head printers. Because of these high-speed characteristics, it is used successfully in the packaging industry and has been certified by ISEGA for food conformity. It is capable of producing high quality rotated bar codes, and with its low coefficient of friction back coat, the life of the print head can be extended.

Formulation	Substrate

Print Speed: 12" per second (300 mm per sec)

Ink Melt Point: 70°C

Film Thickness 4.5µm

Energy Required To Print: Low (10% setting)

Storage Conditions

Product shelf life has been proven through age testing up to 18 months under the following conditions

Out of direct sunlight, store between temperatures of 5°C to 35°C in dry conditions
