

## T037 Wax-Resin Near/Corner Edge Print-head

Super premium wax / resin designed for use on near edge machines, this wax/resin grade shows superior print quality on a wide range of label stocks. The print has a high degree of resistance to chemicals such as antifreeze and methanol, as well as the expected scratch and smudge resistance of a high quality wax/resin ribbon. The coating is specially formulated to work in transmissive mode. The ink coating dissipates static and, coupled with the ribbons low energy requirements, helps to prolong print head life.

Formulation	Substrate									
	Vellum	Uncoated	Semi Gloss	Matt Coated	Gloss Coated	Tag Board	PE	PET	PP	PVC
T037	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓

**Print Speed:** 12" per second (300 mm per sec)

**Ink Melt Point:** 64°C

**Film Thickness** 4.5µm

**Energy Required To Print:** Low (28% setting)

### Storage Conditions

Product shelf life has been proven through age testing up to 18 months under the following conditions

Out of direct sunlight, store between temperatures of 5°C to 35°C in dry conditions
